After a strong rebound in 2021, the automotive aftermarket is forecast to enjoy above average growth in 2022 due to continued strong market demand tempered only by parts availability. The market has already proved its ability to price itself to recover impacts from higher costs and then will benefit from easing supply chain problems in the second half of 2022.

More than 536,000 businesses comprise the U.S. automotive aftermarket industry and form a coast-to-coast network of independent manufacturers, distributors, repair shops, marketers and retailers, small and large. At its core, this integrated grid of professionals is dedicated to providing the quality parts, products and vehicle service and repair for **292 MILLION** vehicles (including light vehicles, medium and heavy duty) on the road today.

GLOBAL STATISTICS

- More than **\$1.8 TRILLION** global automotive aftermarket industry
- Approximately **1.5 BILLION** vehicles on the road

U.S. STATISTICS

- Projected for 2024, **\$514 BILLION** U.S. automotive aftermarket industry (light, medium and heavy duty aftermarket)
